The Lourdes Health System Liver Disease Program provides comprehensive care focused on all aspects of disease management and treatment. Our integrated team of hepatologists, surgeons, interventional radiologists and nursing professionals focus on diagnosing and treating all kinds of liver disease, including hepatitis B and C, liver cancer, cirrhosis and liver failure.

Patients may be referred for evaluation for liver transplant, if necessary. The Lourdes Center for Organ Transplantation is the only provider of organ transplants in southern New Jersey and has the experience and expertise to meet the unique physical, emotional and spiritual needs of each patient in a caring and professional environment.

Hepatology

The Lourdes Liver Disease Program is one of the largest practices for the treatment of hepatitis C. Patients have access to the latest FDA-approved medications, including those that do not require the co-administration of interferon.

Patients are followed long-term, from diagnosis to transplant, if needed. Services include:

- Hepatitis B and C diagnosis and treatment
- Liver transplant evaluation
- Long-term care of liver transplant patients
- Inpatient care of patients with chronic and end-stage liver disease
- Management of refractory ascites
- Treatment of advanced hepatic encephalopathy

- Management of portal hypertension
- Management of hepatobiliary tumors
- Management of acute and acute-on-chronic liver failure
- Treatment of autoimmune and cholestatic liver disease
- Evaluation of patients with hemochromatosis and other genetic disorders

Interventional Radiology and Surgery

Our specially trained interventional radiologists and surgeons used the latest advances in the diagnosis and treatment of liver disease. These include:

- Liver transplantation
- Image-guided liver and related biopsies
- Liver resections for neoplasms — minimally invasive and open techniques
- Minimally invasive surgery, evaluation and treatment
- Surgical portal-systemic shunts
- Hepatobiliary and pancreas surgery
- Liver tumor ablation (microwave and radiofrequency ablation)
- Chemoembolization and radiofrequency ablation for hepatoma

Offices

Liver disease patients are treated at 63 Kresson Road, Suite 105, Cherry Hill. Transplants and other surgical procedures occur at Our Lady of Lourdes Medical Center, 1600 Haddon Avenue, Camden.
