Transfers to Bed or Chair	2.1	2.2
Toilet Transfers	1.8	2.0
Walking	2.2	2.7
Stairs	1.5	2.0
Discharge Level	88.6	91.8

*Data submitted for over 15,000 discharges to a national comparative database based on the functional independence measure (FIM), a nationally utilized 7 point rating scale used to rate the independence of rehabilitation inpatients in 18 functional areas. A higher number indicates greater improvement. A discharge level of 100 indicates independence in all areas.
